

Update as of April 27, 2022

### Update regarding quarantine guidelines

#### **Test Positive for Covid**

- When students/staff **Positive result on ATK** he/she must be getting *RT-PCR* or *Rapid antigen test* to confirm the result from the hospital.
- Hospital Partner of TCIS is Chularat 3 International Hospital  
no cost for Thai nationality with Rapid antigen test only  
Source of information: Chularat 3 International Hospital informs the school.
- Quarantine Period according the doctor considers.
- When recovered students/staff must share a Medical Certificate with the school nurse before returning to campus and also present the negative result on ATK

#### **High Risk Group**

- People in close contact with a person that tests positive for COVID-19
- Talking closely for more than five minutes **without a surgical mask**
- The air in the place is not ventilated and you are within 1 metre of the infected person for more than 5 mins.
- **Live in the same house**

#### **Protocol**

- You must quarantine for **10 days** and take ATK tests then report the results to nurse@tcis.ac.th
- The ATK tests should be taken on Day 0, Day 5 and Day 10. You can return to campus with the negative ATK result after 10 days.

#### **Closed Classroom (According to The Samutprakarn MOPH and MOE guidelines)**

- **One case** : Closed classroom for three days and deep cleaning
- **Two case and more (with the same event)** : Teachers, TA, and students in the class must quarantine at home for 10 days and take the ATK test on the days that are requested by the school nurse.
